Senior Breeder resigns

Ole Mohr joined DeSeed Denmark A/S on 1st October 2018, as Breeding Manager. Ole has worked with various breeding projects and methods in collaboration with the breeding team. Among these were implementation of marker assisted breeding, implementation of shorter breeding cycles, screening as well as the implementation of a new breeding database.

As part of succession planning, Henrik Romme was employed as Breeding Manager per 1. November 2020. Ole and Henrik have been working together in the last 11 months, and all breeding projects have been transferred to Henrik.

Ole Mohr will continue to work in his own company with seed production of vegetable parental lines for DeSeed Denmark A/S

We wish Ole Mohr all the best for the future and we would like to thank Ole for his dedicated efforts in contributing to start up the spinach breeding activities for DeSeed Denmark. His work is a cornerstone in achieving the first fully Downy mildew resistant spinach hybrid varieties from DeSeed Denmark.
